

Spaces worth remembering.

Art, identity and information. Printed directly onto your wall.

DIRECT-TO-WALL PRINTING

German wallPen technology. Made for your space in Singapore.

Your wall is part of the artwork.

We print your design directly onto a suitable existing surface. Choose a single logo, a selective composition or a large mural.

DIRECT WALL PRINT

Ink on the original material. Unprinted areas reveal the timber, texture and colour beneath.

Selective coverage. Original character. No wallpaper sheet joints.

WALLPAPER

A separate decorative covering creates a new surface finish across the covered area.

wallPen equipment

Precision meets creative freedom.

German-engineered wallPen technology brings digital artwork directly to architectural surfaces.

01 Direct application

The printhead applies ink to the assessed wall surface without installing a separate wallcovering.

02 UV LED curing

UV light cures the ink during printing. The substrate and required finish are reviewed for each project.

03 On-site setup

A mobile vertical printing system is positioned and aligned on site before the approved artwork is printed.

Let the material show.

Six starting points. Each surface is assessed before printing.

Concrete

Raw texture. Strong contrast.

Glass

Clarity, reflections and light.

Tile

Design across a tiled surface.

Wood

Keep the grain in the composition.

Brick

Let the relief remain visible.

Metal

A clean, graphic expression.

Suitability depends on coating, adhesion, texture and moisture exposure. White-ink effects and colour appearance require confirmation for the selected material and setup.

04 / OFFICE & CORPORATE

Make your brand part of the space.

Give reception areas and meeting rooms a distinctive identity through logos, typography and colour-led artwork.

DESIGN OPPORTUNITIES

Reception walls
Meeting rooms
Brand stories & values

05 / HOSPITALITY

A place guests remember.

Build atmosphere with a landscape, an expressive artwork or a destination-inspired composition designed around the room.

DESIGN OPPORTUNITIES

Hotel lobbies
Guest rooms & suites
Lounges & resort spaces

06 / RETAIL & F&B

Give the room a signature.

Turn a cafe, restaurant or retail wall into a recognisable visual moment. Scale the palette and artwork to your brand.

DESIGN OPPORTUNITIES

Cafes & restaurants
Retail feature walls
Campaign graphics

07 / RESIDENTIAL

Live with something expressive.

Create a personal feature wall with bold florals, quiet landscapes or a favourite visual theme. Compose the artwork around furniture and light.

DESIGN OPPORTUNITIES

Living & dining rooms
Bedrooms
Personal artwork

Design for the people who use it.

EDUCATION

Make curiosity visible.

Explore space, nature, maps or illustrated learning themes for libraries, schools and shared learning areas.

Artwork and any educational or clinical content are approved before production.

HEALTHCARE & WELLNESS

A considered welcome.

Use colour and composition to shape a welcoming reception, waiting area or wellness environment.

09 / PUBLIC & CULTURAL SPACES

Tell a story at architectural scale.

Connect a shared space to its community with heritage illustration, place-based storytelling and clear visitor information.

DESIGN OPPORTUNITIES

Cultural & community spaces
Exhibition graphics
Wayfinding & interpretation

One wall. Many languages.

Start with a style, a brand story or a purpose. We help shape it for the wall.

01 / Abstract & geometric

Bold shapes, flowing colour and graphic compositions.

02 / Botanical & fine art

Florals, foliage and painterly interpretations.

03 / Landscape & photography

Scenery, destination imagery and photographic art.

04 / Brand & typography

Logos, slogans and your visual identity.

05 / Depth & illusion

Flat printed artwork with the appearance of depth.

06 / Information & storytelling

Exhibitions, diagrams and visitor information.

From idea to wall.

Five clear steps, with the artwork and site reviewed before printing.

01 Share your idea

Send a wall photo, approximate size and project location for an initial quotation.

02 Review the wall

We assess the material, condition, access and printable area.

03 Approve the design

Confirm artwork, scale and placement. Mockups are included where agreed in the proposal.

04 Print on site

After approval and preparation, the team sets up wallPen and prints onto the wall.

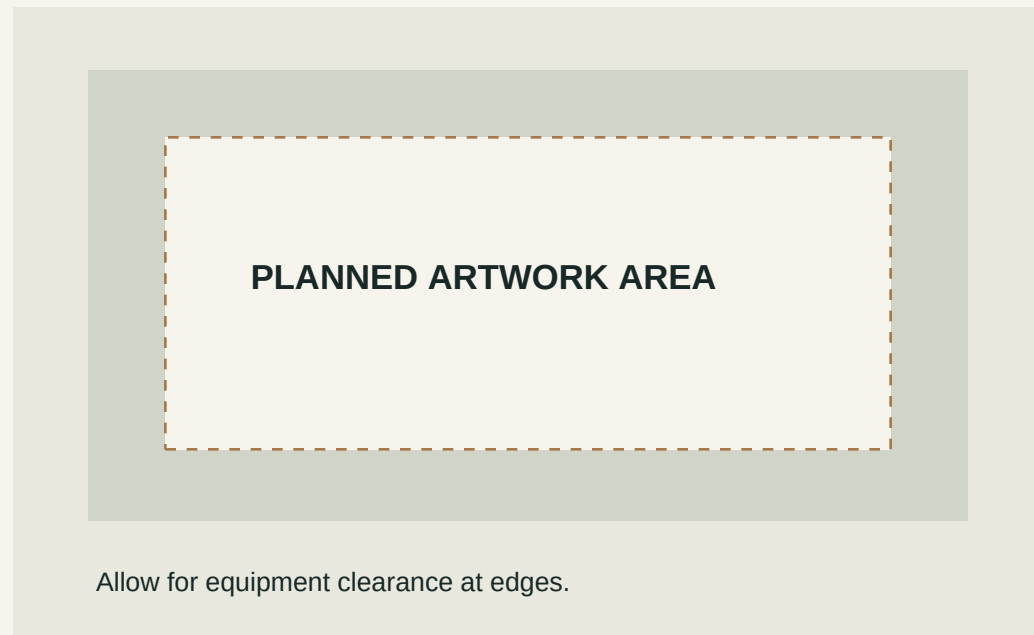

05 Review the result

Check the completed work together and receive suitable care guidance.

A better brief. A better wall.

Plan the artwork with the material, architecture and installation access in mind.

01 / Site information

Send a straight-on wall photo, width and height, material or paint finish, obstructions and project location.

02 / Artwork files

Supply the highest-quality original. Vector logos and original-resolution images help us assess scale and detail. Confirm permission to use the artwork.

03 / Printable area

Allow approximately 30 cm at top, bottom and adjacent wall edges as an initial planning guide. Final clearances are confirmed on site.

04 / Surface preparation

The wall condition and coating affect adhesion and appearance. Existing joints, cracks and relief are not removed by printing.

05 / Wet & exterior locations

Suitability and any protective treatment are assessed case by case. Direct wall printing is not a waterproofing system.

06 / Quote & care

Pricing depends on area, preparation, access and artwork. Cleaning and protection guidance follows the agreed surface and finish.

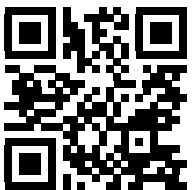

Your next great wall starts here.

Send a wall photo, approximate dimensions and your design idea. Let us explore what is possible.
